

Re: Fulton County  
Air Pollution

EPA Region 5 Records Ctr.

381246

Fulton Industries Inc.  
135 East Linfoot Street  
Wauseon, OH 43567

February 3, 1981

Attention: Bob Nofziger

Dear Mr. Nofziger:

On January 13, 1981, Don Majewski and I visited your company to inspect air pollution sources at the plant and the following will summarize our observations:

1. Since the company has changed ownership we would like a letter of that fact stating the name, address, telephone number, date of purchase and the person to contact for the new company.
2. The two boilers located in the plant do not have permits to operate from the Ohio EPA, you need to obtain permits to enable you to continue operating the boilers. Enclosed you will find two permit to operate applications needed for your boilers, please complete and return as soon as possible.
3. The existing incinerator is not operated the way it was originally designed. The gas burners in the incinerator need to be used if you decide to continue using the unit. In addition the permit for this source (032600118 N001) has expired.
4. Since the dip soldering operation is no longer in existence under the new company, we will revoke the existing permits. Enclosed you will also find the Ohio EPA particulate standards. If you have any questions regarding the above, please contact me at this office.

Sincerely,

Samir Araj  
District Engineer
